Dedicated to the Welfare of the Men and Management

Vol. 3, No. 2

NEWCOMERSTOWN, O., JUNE, 1921

Published Monthly

## NEWCOMERSTOWN FOUNDRY NOTES

Mr. Frank Baxter returned Monday the 16th, and is again directing the activities of the Construction Gang. Frank seems much improved in health and if he will let the other fellow do the hard work and confine his efforts to planning and arranging the work to be done, he will quickly rebuild and come out alright.

\*\*\*\*\*

The brick walls of the new Gasteam Assembling building are just about completed and the pit for the boilers of the heating plant is almost done. The steel window frames are here and ready to be placed, but the necessary steel for the roof supports is being held up on account of the present steel prices.

\*\*\*\*\*

Brick Foreman Henry Mercer is going along in great shape constructing the heating ovens for the new core rooms, but what a lot of brick it takes to build them. When this addition is completed, the present core making capacity will be more than twice what it is today and when the rush season for Gasteam comes on we will be in good shape to take care of our share of the trade. The outlook for heavy sales this Fall and Winter are very good, but at the present time business is very slow and hard to get.

\*\*\*\*\*

Beginning May 16th, the Radiator department was placed on a four day a week schedule which will continue until there is an improvement in the sale of radiators. As the new storage building is now not completed, we are getting cramped for a place to store the loops. Under the new Production Bonus System, the moulders are in position to make as many dollars in four days as they were making the old way in six days and they are taking advantage of it too.

\*\*\*\*\*

The pipe shop is running four full pits and as the production is slow to move, our stock piles are gradually growing larger. That the makers of the pipe are alive to the condition that confronts the Company is shown in the product being made, which is as good as ever went out of the shop. This spirit of producing the best, is bound to win for us in the end.

\*\*\*\*\*

A small fire started in the roof over the small cupolas at the pipe shop Saturday afternoon, May 21, just as we were in the midst of beating Mt. Vernon in the ball game, but several left the field to be of assistance if necessary. Fortunately the fire was soon extinguished and the damage done was slight.

\*\*\*\*\*

Mr. and Mrs. John Horner started on an Eastern auto trip the second week in May. They will likely spend the summer with their daughter, Mrs. Case at Edgely, Pa., between Philadelphia and New York.

\*\*\*\*\*

J. L. Sheets, foreman of the Industrial Railroad, had the misfortune to loose the end of a finger while assisting in some car repair work the first of the month.

## VERNOR D. CRATER

We take great pleasure in presenting to our readers the above likeness of our Mr. Vernor D. Crater, foreman of the Electrical Department. He was born in Newcomerstown, Ohio, April 20, 1864, receiving his early education in the public schools and graduating in the Allegheny Technical School in 1888. He learned Telegraphy and busied himself with it and electricity, being employed by the Coshocton Light, Heat and Power Co., at the time of the grand opening of the Pipe Shop in August, 1895. Many of us can remember that this was the one big day in the history of Newcomerstown. Large platforms had been constructed, suspended from the cranes and people were given a ride up and down the length of the shop. At the night celebration when things were going full blast in the shop, the then present electrician, who was drunk, turned off the lights and power and left the shop full of people in total darkness. Our present President, Mr. W. E. Clow was on the job and asked if there was any one present who could start the electrical apparatus. Mayor Geo. Gardner introduced Mr. Crater who immediately started things going and the next day at Coshocton he received a telegram from Mr. Clow offering him the place of chief electrician. Within the next few days he had resigned his position in Coshocton and came with the Company and has been continuously in their employ ever since. Besides being a bang up good electrician he is a talented musician and a successful painter.

Some of us have had the privilege of seeing some of his work with the brush as exhibited in the show windows of his hardware store which is conducted by his son Edward. Mr. Crater is a self-made man, what he possesses in this world has come to him by hard, diligent application to his work, coupled with a lust to make good and get ahead.

## THE COSHOCTON FOUNDRY NOTES

Mr. E. F. Johnson, of the Chicago office, was at the Ohio foundries for several days recently.

\*\*\*\*\*

After finishing several months' work on plans for additional units to the pits for the pipe foundry, Draftsmen Taylor and Freed have returned to their respective homes in Pittsburgh, Pa., and Wooster, O.

\*\*\*\*\*

Charles Holder has been made foreman of the pipe foundry cleaning shed, and former cleaning shed foreman, George Nelson, has been advanced to pipe inspector. That these two men will make good in their respective new positions no one doubts. Both Nelson and Holder came to the Clow Company about the same time two years ago, and by their own individual efforts, have advanced to the position they now hold.

\*\*\*\*\*

New sand conveyers have been installed on the elevated track leading from the sand pits to the foundry building. The sand is dumped from cars into the chutes and it goes directly into the sand bins without having to be shoveled as was done formerly.

\*\*\*\*\*

Machine Shop Foreman Phil Allen deserves much credit in being able to speed up production on the drill press, and they are now turning out pipe foundry core bars completely drilled in the remarkably short time of twenty minutes.

\*\*\*\*\*

Cashier C. O. Randles attended the annual meeting of directors of the Clow Profit Sharing and Pension Fund, at Chiago during the first week in May. Besides reporting a successful business meeting, he saw some of Chicago with Mr. O'Day. "Nuf sed."

\*\*\*\*\*

Molding Floor Carpenter James M. Williams bought a home on Lynn and John streets through the company's "Buy a Home Plan." Jim has been a Clow employee for a good many years and is very seldom away from his work at the foundry.

\*\*\*\*\*

Machinist Floyd Arnold had a slight attack of appendicitis recently, and was compelled to be absent from his work several days. However, he did not have to undergo an operation, and has fully recovered from the attack.

\*\*\*\*\*

Machinist Basil Holsky underwent a minor operation at the City Hospital the first week in May. The operation was successful and he is now at his work in the machine shop.

\*\*\*\*\*

Pipe Maker Harry English is recovering nicely from a broken leg, and is able to go about on crutches. Harry says he wants to hurry and get well before a certain "Fair One" from Arkansas comes to Coshocton.

\*\*\*\*\*

Our official stamp-licker was so badly squelched Monday by the lawn mower that we are wondering if he will pull through. Address flowers to "WRY."

**PERSONALS**

Vice President Kent S. Clow visited the foundries May 9th and 10th.

Supt. J. W. Mugford was in Cincinnati May 2nd for a day's business.

We are glad to note that John Harbolt is getting around on crutches recovering from a broken leg received in the pipe shop.

O. C. Moore, newly elected trustee of the Clow Employees Profit Sharing and Pension Fund was called to Chicago Friday, May 6th, where the annual meeting of the trustees was held and matters pertaining to Fund discussed. We are not advised of any changes in the operation of same for the coming year.

Earl Smith has purchased and is now occupying the beautiful bungalow just completed by Chas. Loader on West State St. Mr. and Mrs. Smith are as happy as can be and they sure have a home to be proud of.

Clarence Sarvis of the Flange Machine Shop, who saw "over-seas" duty with Co. L, 147 Inf., 37th Div., was elected Commander of Thomas C. Montgomery Post No. 431, American Legion. Mr. Sarvis first came to Newcomerstown with Co. L to guard the Penna. railroad bridge west of town at a time when we were getting into the war. After his discharge he returned to his former home in Toledo and later entered our employ here.

One day the first of the month, Clarence Wigfield lost \$15.00 in going from the Flange Machine Shop to the Store Room, and to date he has not been advised of its being found. We are giving mention to this in the hope that the person who found the money, consisting of a \$10.00 and \$5.00 bill will be informed as to the owner of same and return it to Clarence and receive a suitable reward.

Messrs. Chas. Murphy, Zack Brown and Alex. Winston have purchased a lot on the east side of Clow Ave., and have built for their use a good substantial building in which they will conduct a pool room and barber shop. This will fill a long-felt want for the colored men have not had a place to call their own in which they could carry on their sports and pastimes and we are mighty glad to see them get this place of amusement.

**NEW A. M. E. CHURCH PROJECT**

A new building is being erected on the east side of Clow Ave. for the members of the local A. M. E. congregation. The building is to be 24x30, just a plain structure, as the congregation is few in number and it is the intention of the present trustees to enlarge the building as future conditions require.

He had held forth for so long on the subject of his adventures that the entire smokingroom was distinctly bored. Finally he reached India.

"It was there that I first saw a man-eating tiger," he announced boastfully.

"Pooh! that's nothing," said a mild-looking little man, edging towards the door. "I once saw a man eating rabbit."

And he sauntered gracefully out.

Men who succeed in reaching places of power and influence are usually those who keep on working after their companions have quit.

**No Matter What You Do**

Did it ever occur to you that a man's life is full of crosses and temptations? He comes into this world without his consent and goes out against his will, and the trip between the two is exceedingly rocky.

When he is little the big girls kiss him and when he is grown up the little girls kiss him. If he is poor he is a bad manager, and if he is rich he is dishonest. If he needs credit he can't get it, and if he is prosperous every one wants to do him a favor.

If he is in politics it's for the pie, and if he is out of politics you can't

find a place for him and he is no good to his country. If he doesn't give to charity he is a stingy cus., and if he does he does it for show.

If he is actively religious he is a hypocrite, and if he takes no interest in religion he is a hardened sinner. If he gives affection he is a soft specimen, if he cares for no one he is cold blooded. If he dies young there was a great future for him, if he lives to an old age he has missed his calling.

The road is rocky but man loves to travel it, and after all there is a good deal of satisfaction, especially if he is well dressed.

**THINK THIS OVER**

France has a population approximately of 39,000,000. Forty per cent of these people take care of their money. Which means that over 15,000,000 French folks practice thrift. America has a population approximately of 105,000,000. Not more than 10 per cent of Americans save their money.

American women are spending \$750,000,000 a year for cosmetics.

The bee, in proportion to its size, is thirty-five times as strong as a horse.

The balance wheel of a watch moves more than 3,500 miles in a year.

The United States leads the world in commerce, but ranks ninth in education.

The Chinese usually open a conversation with "How old are you?" instead of "How do you do?"

The money lost through fires in the United States from 1915 to 1919 was sufficient to build new homes for 1,416,375 persons.

Owing to the shortages of teachers between 100,000 and 400,000 children in the United States last year had to go without schooling.

Over \$17,000,000,000 must be provided by the United States government to meet its running expenses for the next thirty months.

For the first time in history, the great Krupp works at Essen, Germany, have worked a year without making a single implement of war.

The 240 industrial strikes in New York City in the past year meant a loss to the workers of over 1,000,000 working days; in wages \$50,000,000.

In 1893 gasoline sold for 6 cents a gallon. In 1896 there were only four automobiles in the United States. The first transcontinental automobile run took over two months—from May 23 to July 26.

A million dollars in gold weighs 3,680 pounds, or nearly two tons. A billion dollars in gold coin weighs a thousand times as much, or 1,840 tons—nearly 2,000 tons. In silver coin a billion dollars would weigh 29,460 tons.

There are more than fifty newspapers in New York City, in fourteen languages; more newspapers than all of educated Norway and Sweden combined and five times as many, in proportion to population, as any other great city in the world.

The average income of unmarried women, in New York State (with no incumbents) who reported their incomes last year, as subject to State tax, was \$2,394, while that of men without a family was \$2,495.

Automobiles registered in the United States last year numbered 9,211,295, an increase of 1,645,849 over the preceding year. The registration and license fees amounted to \$102,034,106. In New York State alone the number of cars registered in 1920 exceeded the total registration for the United States in 1919.

Before the World War the people of the United States owned to other countries \$5,000,000,000. This debt has been paid, and there is now owed to us \$10,000,000,000. We hold the largest reserve in the world, while our bank deposits exceed \$24,000,000,000, exceeding by millions the entire bank deposits of the world.

The United States is characterized as the "most spendthrift nation the world has ever seen" by William Mather Lewis, Director of the Savings Department of the United States Treasury. "We spend \$22,000,000,000 yearly for luxuries," he says, "and this stupendous sum was split in two ways we would have enough money to solve the world's capitalization problem."

Ministers are making sacrifices that most people know nothing about. One minister receiving a salary of \$800 a year, gave his boy \$400 a year to help him through college, while he and his wife struggled along on the remaining \$400. Another minister saw a penniless old age staring him in the face. He left the ministry, went into business for four years, made \$25,000 and then went back into the ministry.

**Don't Drink too Much Water**

Warm weather is now due and more coming and we want to offer a word of advice to those who work in the heat and perspire freely. One of your greatest enemies to doing a full day's work is the amount of cold water you drink at one time. Drink more often, take a mouthful of cold water and let it lay in your mouth for the cooling effect and spit it out and only swallow a very little bit of water each time. It is not the large quantity of water you take into your stomach that quenches the thirst—quite the reverse, too much cold water in the stomach will give you cramps and stop the sweat-

ing, and then you burn up and have to quit the job for the day.

Try the plan suggested and you will find that you get on much better and will feel like yourself when the day's work is done.

**COSHOCKTON BIRTHS**

A baby son has been welcomed to the home of Mr. and Mrs. R. S. Hosfelt.

Mr. and Mrs. Myrle Lockard are rejoicing over the arrival of their first born, a baby girl, born Sunday, May 15th.

**Prices Falling**

We copy the following from a local paper under date of the first week in May. It is interesting to all of us to know that the commodities of life are coming down in price, and there has been a decided decline in prices of some of the articles quoted since the article appeared.

ONE YEAR AGO

100 pounds of sugar -----	\$29.00
1 bushel of potatoes -----	5.00
	\$34.00

Today that same \$34.00 will buy at the same store:

100 pounds of sugar -----	\$8.50
1 bushel of potatoes -----	.90

and in addition thereto:

2 lbs. of coffee -----	.64
3 quarts milk -----	.36
2 pkgs. shredded wheat ----	.30
1 box macaroni -----	.11
3 dozen eggs -----	.69
5 lbs. soup beans -----	.30
5 lbs. rice -----	.30
6 cans corn -----	1.20
4 lbs. butter -----	1.32
6 cans peaches -----	2.10
6 cans tomatoes -----	.75
2 bottles salad dressing ----	.70
1 lb. cocoa -----	.40
3 boxes Dutch cleaner -----	.33
1-4 bbl. flour -----	2.30
1 lb. baking powder -----	.24
4 boxes salt -----	.40
1 bottle catsup -----	.15
5 lbs. starch -----	.45
2 jars olives -----	.70
1 can salmon -----	.45
2 cans beans -----	.30
1 box cake flour -----	.45
6 cakes soap -----	.50
2 boxes seedless raisins ----	.50
2 boxes Jello -----	.20
6 cans pears -----	2.40
6 cans pineapple -----	2.40
6 boxes of matches -----	.30
1-2 pt. olive oil -----	.50
5 lb. live chicken -----	1.80
3 loaves bread -----	.36
5 cans milk -----	.70
	\$34.00

**BASE BALL AT COSHOCTON**

On May 2nd the Coshocton Industrial Base Ball League opened with Clows playing Tyndal. The game was hard fought from the start to the finish and when the last man was out the score stood 6 to 4 in favor of Clows. Although the air was chilly and our boys had had but one practice before the game, only few errors were made and an exhibition of good base ball was given. Our team is much stronger than last year. Clows battery of Clark and Callahan is second to none in the league, and with the class of base ball our boys are now playing, it looks like a safe bet that the league pennant will go to Clows at the end of the season.

On May 10th Clows took over the strong Hunt-Crawford team by the score of 10 to 1. Our infield and out-field are playing fast ball with Wm. Bordenkircher and Clarence Hultz fighting it out for batting honors.

Wednesday, May 18th we did not have such good luck, and lost to the Art-Glove team 5 to 4. As the score indicates, it was a close game and Clark had seven strike-outs to his credit, but numerous errors on Clow's part accounted for the final score. The line-up for the three games played:

Callentine lf.	Callahan, c.
Bordenkircher 3b	Pierce, 1b.
H. Clark cf	E. Berry, rf.
Bordenkircher, 2b.	Randles, rf.
Hultz, ss	F. Clark, p.

Coshocton—Guy P. Clow, Edw. Rohr, Laura Cooper, Paul McNary, Gus Kratz.

EDITORIAL

The "Buyers' Strike" had its first serious effect upon we employees of the Company Monday, May 16th, when a 10 per cent. reduction in wages became effective. This step was taken by the management after every means had been exhausted to move our product, but it would not move. In many organizations serious wage reductions have occurred and then the plants have not been able to operate to capacity, and only part of the time, just making the product that could be disposed of. We are still going on with production with the hope that there will soon be a buying movement. This reduction of wages was made to help lesson the cost of making pipe and radiation so that the Company would be in position to pick up some little business. There is still a way for us to help them lesson the cost of production, by producing with less loss, and have you stopped to consider that this is also a way to help make up the cut in wages. Instead of having a 10 per cent. Production Bonus, make better and more product and raise your bonus to 20 per cent. This can easily be done and your pay-check will be the same size it used to be. In this institution a reduction of wages doesn't necessarily mean any less money for the employees, for taking advantage of the Liberal Production Bonus, increased production and less loss of the product we make will in the end make us as many dollars as we were getting and so far as the Company is concerned, they are ahead of the game in paying the bonus, for they have so much more good product to sell. Instead of being dissatisfied with your wage reduction or with the Bonus you have been receiving, forget them, and if you are a producer, make better and more product. If you are a producer, the only way you can help production is to do your part good and quickly to the end that the producer will not experience any delay or difficulty in keeping his production up to standard.

A long, strong, hard pull—altogether—a co-operation between the employees and the Company will be worth many dollars to each of us.

\*\*\*\*\*

Sam Ridley was operated on at Coshocton hospital May 7th for relief of some hip trouble which had been troubling him for years. The operation seems to have been successful and we hope that he will soon be able to go to work again.

\*\*\*\*\*

C. E. Gardner and C. C. Starker spent May 13th in Columbus attending Shrine doings and report a good time. Guess C. C. got his feet some warm walking across the desert sands.

An Interesting Fable

Once upon a time there was a young chap who began at the bottom of a business. His work wasn't as important as the running of a railroad or the managing of a government, but the young chap treated it as if it was. From the way he charged into his little job you might have thought that it was the prime ministership of England.

Right from the very start it was easy to see that he "hated" work worse than anything else in the world, for he was always thinking up ways to get it done more quickly. He would spend the whole evening fussing and stewing one little idea, just to save an hour's time in the day's routine. It got to be so that his desk would be all cleaned up every afternoon by 3 o'clock. The boss said there was no hope of keeping him busy on that job, so he made him assistant to the vice-president in charge of the operating division.

But that didn't seem to help a bit. The young chap had caught a disease known as "System-on-the-Brain" and soon had things lined up to cram a 9-hour day's work into 6 hours. The amount of time that the fellow found to read the com-

pany's literature and the business magazines was a caution. It got to be so noticeable that the vice-president said he couldn't stand for any such loafing as that a moment longer. The young chap had to be kept busy, he said, even if they had to make him a superintendent. Which they did.

There was a mountain of work connected with this job, and for about a month the young chap didn't get time to eat more than a sandwich for lunch. But he soon fell into his idle way again. By reorganizing his department and putting in some crazy sort of new method of manufacturing, that no one had ever heard of before, he found he had just as much extra time at his command as ever.

Finally the president heard about his idle ways and decided to have a business doctor examine him. The doctor pronounced it an incurable case of executive ability. So, as a last desperate resort to keep the young man busy, they made him efficiency engineer.

"How do you do it?" they asked him.

Then he told them that he always planned his work ahead, did one thing at a time, and did that well.

Some Coshocton Foundry Pick-Ups

Found—wading around the circus ground, May 5th, E. V. Rohr.

Found—by Cashier Randles—1 heating system boiler that will not automatically close its own water valves. Also one bad cold.

Our stenographer is no longer neutral. She is on both sides now.

It is not everyone that can sit on the Mayor's front porch until the wee' sma' hours.

Perhaps some don't want to be quite so friendly with our beloved Mayor.

The city has given a new name to a Planning Department gentlemen. It is Dock Crat.

From painful experience we have learned that the three anthems of the Industrial Engineers are:  
1—Beautiful Ohio.  
2—Beautiful Ohio.  
3—Beautiful Ohio.

Assistant Foreman Huff has been wandering around the foundry with a dazed look on his face, and muttering to himself. We listened closely and heard this: "Say, El! Isn't there some way we can talk this over and get Butch out?" We suggest trading places, Pete.

Dawson, as yet, hasn't been able to figure out just how a magnet can pick up a load of wood, or a bale of hay. He has tried hard, too.

The Mayor's daughter has entered the City Hospital as a student nurse. One of the office force intimated that he was going up in front of the hospital and let a car hit him. After thinking awhile, he said, "It would be just my luck to have them rush me down to Keenan's hospital, or else be killed outright."

During the Elks' convention in Coshocton Guy Clow was seen to be leading the procession.

Smotzer was one of the many Elks in the parade.

We didn't think Joe McCloy was an Elk, but he awakened all his neighbors when he tried to find the key hole to his front door after spending several hours with the Elks.

Again we hear from Blacksmith Jack Merrell. This time Jack has been catching one-eyed fish. Tell us where there are some blind fish and maybe we can have fish for breakfast.

Our old friend John Tury returned to the chipping shed after trying out farming near Cleveland, Ohio. John decided the air hammer with Clows is better than raising potatoes.

Ralph Stickle has worn out all his handkerchiefs, waving them after seeing a certain performance at the Mystic Theatre. Ask Ralph.

"Pete" and "Gus" attended Sunday services upon an invitation from Bob Hagans on May 8th.

Coremaker Bob Hosfelt helped unload the elephants on circus day.

Ralph Stickle went to the circus but has not been heard to report anything he saw except what he saw in the inmost side show. It's no wonder he is seeing alligators around the foundry since the circus.

Speaking of circuses—too bad Todd could not get away from the shop on May 5th in time to water the circus elephant. We feel very sorry that he did not get to attend the show.

Millie Shurtz and Jack Byers to date hold the record jointly for eating the biggest meals at the restaurant.

Ask Millie Shurtz how it feels to visit the "Crazy House" at a street carnival.

Repairman Carl Lepley is getting to be quite an expert at playing golf. He can be found on the Country Golf links most any afternoon swinging the clubs.

Safety First

The Company spends lots of money to promote the idea of Safety First and they do not want an employee working for them who is not doing all he can to prevent accidents, not alone to himself, but to others as well. If we have any so old and out of date as to what protection the human being in industry is entitled to, they should be labeled "junk" and placed on the scrap pile for keeps. We doubt if we have one person so ignorant that he doesn't fully appreciate that the Safety First movement was, and is, the greatest blessing to humanity that ever was instigated. It is your first duty to be safe in your work and then it is your further duty to see that your fellow worker is doing his work in a safe way. We are learning to regard accidents as being an unnecessary scheme in our lives, whereas a few years ago we would comment on an accident with "Oh, well, it could not be helped." Accidents can and are being helped everyday and the man who is onto his job will not have accidents, if he is careful.

BIRTHS

May 6th was the one big day in the lives of Mr. and Mrs. Walter Albright, for on that eventful day the stork brought them a baby boy to bless their home. Walter is stepping around bigger than most anybody in the machine shop these days.

Mr. and Mrs. Bob Howard are the proud possessors of a baby boy born April 27th at their home on Rodney Heights. Mother and baby doing fine.

SURPRISE PARTY

Quite an enjoyable surprise party was pulled off on Dr. Ray R. Mason Thursday evening, May 12th by the office force, their wives and husbands, at his new residence on Carlyle st. The cats were provided for in the way of a covered dish party, the variety and quality of which was most pleasing to all. The evening was spent in social converse and cards and at an early morning hour the guests departed leaving as a memento of the occasion a beautiful floor lamp.

Many of the men went to Cleveland to see "Babe" Ruth "knock 'em over the fence" Sunday, May 15th, when Cleveland played New York. They all came back disappointed though, for the "Mighty Babe" did not get a hit. It is reported none bet on the game, but several lost money on the train in a sociable game of "African Golf."

C. J. Cooper, after being absent from his place on the molding floor on account of sickness, has returned to work.

Joe McCloy goes fishing May 19th and catches twenty speckled bass. That is what Joe says, but who saw the fish?

May 17th: Blanding, Patterson and McCloy go to Newcomerstown in the forenoon. Clow, Mullett and Tschudy go in the afternoon. However, the foundry operated just the same, if not better, and all the above named gentlemen were sorely disappointed that they were not called by phone that something had gone wrong in their department and needed their assistance.

Walter Glass has been wearing a couple of swollen eyes for the past few days. Walter says a bee stung him, but we are wondering if the elephant at the circus didn't kick him while he was carrying water for Jumbo.

**League Standing**

	G.	W.	L.	Pctg.
Mt. Vernon	6	5	1	.833
Clows	6	4	2	.667
Newark	4	2	2	.500
Bladensburg	6	2	4	.333
Coshocton	6	2	4	.333
Utica	2	0	2	.000

**Clow Team Batting**

	G.	AB.	R.	H.	Avg.
Cummings	6	23	10	13	.565
Welsch	5	21	2	9	.381
Lyons	6	27	7	9	.333
Sheets	6	26	2	8	.308
R. Chaney	2	10	1	3	.300
Latham	6	25	4	7	.275
R. Norman	4	14	1	4	.286
Larkin	6	28	3	4	.143
Stewart	6	28	2	3	.107
Underhill	3	12	5	1	.083
F. Norman	4	15	1	1	.067

The Clows fifth and we believe, most successful season, is now well under way. And guided by Cy Young, is without doubt the strongest aggregation in the newly organized Tri-County League. Under Cy's efficient coaching our team is improving right along. To date we have won three games from Coshocton, and one from Mt. Vernon. We have lost one game each to Mt. Vernon and Bladensburg.

The acquisition of Jack Cummings, outfielder, and Bunny Pearce, catcher, has strengthened Clows lineup considerably, particularly from a batting standpoint.

Welsch is in his old-time form and Norman is showing wonderful improvement, and as Cy thinks his old-time famous salary whip will handle all emergencies, we have no fear from the pitching end.

"Bunnie" Pearce started to work in the Flange Machine Shop Monday morning, May 23rd. The interesting part of this is that he will be a great addition to our ball team as he was at one time catcher for the Cincinnati Nationals and was forced out of League ball on account of a broken leg. Mrs. Pearce will also come here where they will establish a home, and we hope, remain permanently with us.

"Jack" Norman of the Cleaning Sheds is the hero of the hour, having won the second game he ever pitched, defeating Coshocton on their own diamond Sunday, May 22. "Cy" Young thinks Jack has great possibilities and with the proper backing, which he is getting, he should make a record for himself.

"Jack" John Cummings has accepted employment on the Repair Gang and is certainly doing his bit in left field and at the bat. We would like to invite Jack to bring his interesting family to Newcomerstown and be a permanent part of our organization, as he is a coming young man and should fit himself for a good place here.
