## FOREWORD

The present publication is a comprehensive index to the names of all persons whose obituary appeared in the **Newcomerstown News** during the decade 1960-1969. Also included are brief death notices and biographical sketches; there are very few of the latter. Sometimes golden wedding anniversary announcements are indexed if they contained sufficient information to be of interest to the family researcher. They often include a photo. Death notices of stillborn infants are not included.

Please note that the age of the decedent is given after the name where this was known. The date given with each entry is the date of publication of the **News**, NOT the date of death. Publication always occurred on Thursday during this decade.

This list includes approximately 2,700 entries representing about 1,800 individuals. Most women were listed under both their maiden names and married names where this information was available. If they married more than once all names are indexed. In some cases information that was not in the original article could be supplied by the editor and is indicated in [brackets] as an aid to the researcher. This information was generally added from cross checking other obituaries, such as those of spouses.

This index is a research tool; if you find a name that the editor has missed please add it. Original copies of the **News** are located at the Newcomerstown Public Library. Plans are being made to microfilm the papers in the near future, and in time microform copies should be available there and at the Ohio Historical Society as well as possibly other repositories.
