NEWCOMERSTOWN, O., OCTOBER, 1920

Published Monthly

NEWCOMERSTOWN FOUNDRY NOTES

A new and valuable feature has been added to the present life insurance carried by the Company on the lives of the employees. Any employee under 60 years of age carrying the insurance who becomes totally disabled will be given the amount of the policy when such disability is proven, in amounts to be determined by the condition which applies to each individual case. This is simply an arrangement whereby totally disabled employees under 60 years of age can have the benefit of the money due on their life insurance while they are living rather than have it come to their families only after death. We feel that this is a very liberal concession and one that will be greatly appreciated by anyone so unfortunate as to become totally disabled. We have printed slips which cover this new feature that are to be attached to your present policy. Come to the Employment office on your way home and get the slip to attach to your policy.

The Construction gang is finishing roofing the roof over the cleaning sheds up to and adjoining the flange machine shop. This is a much needed improvement and will be highly appreciated by the workmen of that department.

Material has been ordered for the erection of the dust arrestors at the cleaning sheds and soon as it arrives, Baxter's gang will soon have it working.

Effective October 1, 1920, Mr. Herman Riggs assumed the duties of assistant to Mr. Tyler of the Gasteam department. Mr. Riggs came with us in June, 1919, a returned soldier and was given employment in the Gasteam department. His work there has been so entirely satisfactory that he has earned the promotion and we bespeak for him success with the company.

MARRIED

On Saturday evening, Sept. 4th, at 6 p. m., Miss Wilda Harbolt was united in marriage to Mr. Mike McCrone, socket maker. These fine young people are being showered with congratulations and best wishes from their many friends and we are mighty glad to welcome them into the Clow family.

Mr. Laken Swigert of the Radiator department, was united in marriage to Miss Mayme Emily Schwartz of Coshocton, the ceremony being performed at the home of the bride. Mr. Swigert is an ex-service man of several months over-sea experience and a splendid, valuable employee. We are glad to welcome them into the Clow family and extend congratulations and best wishes for a happy, prosperous wedded life. They are "at home" to their many friends at the Swigert home on E. Main st.

Mr. Al. Hammersley of the loading gang was operated on Aug. 26, at City hospital, Coshocton, for appendicitis and has recovered from same very nicely, but not yet able to go to work.

MY CREED

I believe in the work I am doing; in the firm I am working for and in my ability to get results. I believe in working, boosting and taking pleasure in my job.

I believe that a man gets what he goes after, that one deed done today is worth two promised for tomorrow, and that no man is down and out until he has lost faith in himself.

I believe in today and the work I am doing, in tomorrow and the work I hope to do, and in the sure reward the future holds.

I believe there is success somewhere and sometime for every man willing to work.

I am ready to do it right now, and right here.

—Selected.

Message From An Employee

Mr. and Mrs. H. E. Decker wish to thank the James B. Clow & Sons company for the support they have given them in the completion of their new home, which we now occupy, near South Lawn cemetery.

I finished moving into our home September 20th, and feel as though we are living in a new heaven, in that I have a place I can call "home," which is all my own. Although I have always paid my rent when due, yet in eleven years I have had to move nine times, and have paid out enough money in rent to have bought a good home, not to mention the inconvenience of moving from one house to another. But now, when the next man comes along and asks me to move we will feel like murdering him.

Fellowmen, take this as a warning and buy your own home and have something you can call your own and to know that when you go to bed at night you are under your own roof. When you pay rent at the end of the year you do not have anything to show for your money, but the other fellow has. To the single man, invest your money in real estate. To married men, who do not own homes, you had better buy now, for in a few years you will be old and can not afford it, so buy now while you are young and can pay for it.

Again thanking the James B. Clow & Sons for the proposition extended employees to assist in buying a home.

H. E. Decker and wife.
(Pattern maker)

BORN

On Aug. 31st a fine 9½ lb. daughter arrived at the home of Mr. and Mrs. Chas. Coutts, Canal st. Mother and daughter doing fine. Charlie says she's the best ever.

The entire organization joins in extending sympathy to Messrs. Mellicie and Wm. S. Shurtz in the loss of their father, Wm. Shurtz, who died at the home of the former Saturday, Sept. 25th. Funeral services were conducted on Monday and the aged father laid to rest in the village cemetery.

THE COSHOCTON FOUNDRY NOTES

The new sand screening and sand mixing machine for the molding floor has been completed and put in operation. This is a decided improvement in the handling of the molding floor sand. The castings are shaken out on a jarring machine and the sand drops into a hopper where it goes through several screens and mixers until it is conveyed to the large and final hopper, thoroughly screened and tempered ready for use.

The Drafting Department is now all new and in the midst of their glory with Edward V. Rohr in charge and his worthy and hustling assistant Wm. (Bill) Reindl, who has been transferred from the Newcomerstown plant.

Mr. J. F. Kent, who has been at the Coshocton foundry for several weeks in the capacity of consulting engineer for the pipe foundry, left for his home in Florida the first week in October.

DEATHS

The sympathy of the entire foundry is extended to our Cashier C. O. Randles, in the recent death of his mother, Mrs. C. R. Randles. Mrs. Randles had been a long sufferer during her last illness at her home in Columbus. Clarence was with her several days before her death.

BIRTHS

A son, Francis Eugene, was born Sept. 26th to the wife of our pipe shop repairman and star base ball player Henry Clark. Henry is all smiles, and a very proud father and says the youngster has already began crying for a baseball.

A daughter was born to Repairman Harold Kinkade and wife on Friday, Sept. 24th, and has been named Mary Jane.

A smile which will not rub off is seen on the face of Foreman Ray Yingling, since he and Mrs. Yingling are the proud parents of a baby daughter, Margaret Jane.

Storekeeper J. H. Spring and family spent their vacation visiting friends and relatives in southern Ohio.

THE VOICE OF THE CHURCH

I know you will pardon my delay for I have not forgotten, as I believe memory is an attribute of eternity, and all the deeds of men, whether good or bad, they will see some day the respond to the call of God through me, His humble servant, to the good men of the shop secured the deed of the church lot for the building of a Colored Methodist church in Newcomerstown, O.

I wish to express to you my highest appreciation for your donations, both large and small. My rally netted \$59.12, of this amount \$40 was donated by the white people in the shop for which please accept our thanks.

Sincerely yours,
Rev. J. H. Hairston.

EDITORIAL

Since the inauguration of the Employees Profit Sharing and Pension Fund last March, we have several men now in our employ who have passed the three year period of service which makes them eligible to become members of this fund.

Any employee who has had three or more years service with the Company may deposit not less than 2 per cent nor more than 5 per cent of his wages to be put into this fund and each March first, the Company will add to this fund not less than 5 per cent of their earnings for the previous year. The combined earnings of the employees and the company, so deposited, are controlled by a board of directors selected by the Company and the employees jointly and it is their duty to keep this money working where it will earn the highest rate of interest to be obtained from safe investments. After you have been a depositor for ten or more years and wish to retire from the services of the company, you will be given back all the money you have deposited in the fund with the interest it has earned and in addition to this you will be given your portion of that which the company has deposited with the interest it has earned. To the employee who does not find it to his advantage to remain with the company for a period of 10 or more years after he has gone into the fund, he can withdraw at any time and he will be given all that he has put into the fund with interest at the rate of 4 per cent per annum compounded semi-annually. The only indefinite part of the fund is the amount the Company will contribute each year and that amount will be just what the employees help make it, but we are quite sure it will never be so small that it will be disappointing to the depositors of the fund. To the young man starting out in this world to make good, we can not imagine how he can get into a better proposition to insure himself and family that at the end of 20 or 25 years service, they can withdraw enough money to keep them the rest of their days in peace and plenty.

Where in this section of the country can a young man of 20 who is married and has a family on his hands, go to work and by depositing 5 per cent of his earnings for the next 25 years retire at the age of 45 and have all the money needed to care for himself and family the rest of his natural life, besides having enough to live on all during those 25 years. We believe that this proposition is worthy of most serious consideration by our employees who are eligible and not now members of the fund, and good enough to put up to your friends to induce them to come into the employ of the Company. Think it over good and hard and then come to the Employment Office and make your application for membership in the fund.

Russell Wagner, of the Cupola department, who has been off from work several weeks on account of a badly bruised hand, has returned to work.

Cupola Foreman Grant Callentine and wife spent one day during Fair Week in Canton, Ohio.

Women's Department

Life is very much like an education, in order to make it really worth while one must share it with others.

When making jelly it is not advisable to boil more than four cups of juice at a time. The greater the volume of any given liquid the longer the time to reduce the amount. Prolonged cooking makes the jelly dark. Apple jelly cooked quickly will be a pale amber in color. If there is a lot of juice cooked at once the jelly becomes almost a dark topaz.

To restore the color to worn black kid gloves, dip the tip of a feather in a solution of olive oil and black ink in the proportions of three or four drops of ink to a teaspoon of the oil. The gloves are rubbed with the solution and dried in the sun.

When teaching any one to tat use a heavy cord or thread to show how to make the knot. It is much easier for the beginner to understand how it is done than if a very fine thread is used.

Dry starch is good to rub on the hands while doing fancy work if they perspire.

For Waxed Floors—A worn out carpet sweeper makes a handy floor polisher if the brush is taken out and a weight such as several bricks put in its place. Cover it over with heavy carpet.

Rolled Oats Muffins—Mix with a cup of cooked and warm rolled oats one cup of flour with which has been sifted four teaspoons of baking powder, one quarter cup of sugar and a teaspoonful of salt. Mix well, stir in three teaspoonful of fat—melted—one-third cup of milk and a beaten egg. Bake in heated, greased gem pans for 20 minutes.

Salad—Cut up one pound of marshmallows, pour over them one-half can of grated pineapple. Stand this aside several hours. Then add three sliced bananas, one-quarter pound of chopped nuts, two oranges cut in pieces and a half cup of whipped cream. Serve on crisp lettuce leaves.

Fried Tomatoes—Take solid tomatoes, not overripe and slice in one quarter inch slices. Season with salt and pepper, dip into beaten egg and cracker crumbs or flour. Fry in fat until a golden brown.

Pick-Ups and Personals

Machinist D. W. Dawson and wife recently spent a very pleasant vacation in Canton, Ohio, visiting friends.

Pipe Maker Chauncy McPherson was compelled to be off from work several days recently on account of sickness.

Machinist John Criswell recently had his tonsils taken out and John says he had the operation performed because all the other children in town were having their tonsils taken out.

Pipe Shop Flask Setter Mike Veedy recently bought a horse. Mike says he was tired of walking to work, and as he could not get his cow "broken" to ride, he had to buy a horse.

Machinist "Bill" Moore was recently off from work on account of being sick. The report circulated in the machine shop that "Bill" was suffering with the gout in his heel.

We have heard many fish stories as to the best and easiest way to catch fish, but Machinist John Criswell has an entirely new scheme. He says he always walks backward when fishing so the fish will not see his shadow and will not get scared.

Carl Sturtz says John Criswell's way of fishing won't work, for when he tried to carry the big water bottle in the machine shop he dropped the bottle and not only broke it, but also got a wetting.

If any of our readers have any auto repairing to be done, especially on the brakes, we do not advise them to try fixing the broken parts as "Nick" Carter suggests, for we do not believe the brakes and radiator of an automobile are in any way connected. However, "Nick" thinks so.

Foreman Tschudy was away from the foundry a couple of weeks recently taking his vacation, which

he spent very pleasantly at his home in Newcomerstown.

The joke is on Assistant News Editor and Machinist Paul McNary this issue, for when Paul bought some cement and had his father carry it home Paul found he had made a mistake and had sacks of sand. Paul says it was a joke played on him, but a fellow worker said Paul didn't know sand from cement.

Repairman Harry Miller is organizing a motorized circus and wants all who have a donation to see him at once. John O'Brien has furnished his automobile for the motor bus. Harry has a trained cat, a singing sparrow, a walking bullfrog, and is negotiating a trade with "Bill" Swigert for a Belgian hare which is trained to fight any bull dog. He has engaged the service of Harry Kinney to work as snake charmer. We asked Miller to tell us of his "side show," but he refuses by saying "Wait 'till the show starts and you will be agreeably surprised."

The day the electric poles were down and power for the foundry was off, Blacksmith "Jack" Merrell went to sleep and dreamed about drowning in a tank of milk. Now, Jack, be honest, wasn't it the sweet juice of yellow blackberries you were dreaming of?

PERSONALS

Mr. Walter O'Day was at the foundry a few days the first of the month.

Jack McConnell of the blacksmith shop attended the State Fair and reports a good time.

Mr. and Mrs. C. M. Stofer attended the State Fair.

Miss Alice Wimmer, visiting nurse, has returned from an extended visit with her sister in Denver, Colorado.

34. Janet Ella Mackey—Oscar Mackey, Moulder.

IRELAND WINS

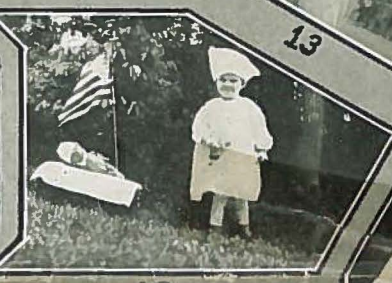

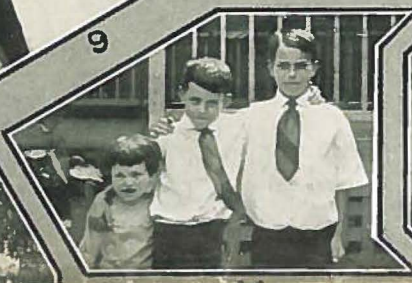

"Talking of hens," remarked the American visitor, "reminds me of an old hen my dad once owned. She would hatch out anything from a tennis-ball to a lemon. Why, one day she sat on a piece of ice and hatched out two quarts of hot water."

"That doesn't come up to a club-footed hen my mother once had," remarked the Irishman. "They had been feeding her by mistake on sawdust instead of oatmeal. Well, sir, she laid twelve eggs and sat on them, and when they hatched eleven of the chickens had wooden legs and the twelfth was a wood-pecker!"

Ralph Curby and family enjoyed the State Fair.

CLOW

KIDS

THE HOME PLAYERS ARE DISSATISFIED

By O'Sea

The Clow base ball season has about drawn to a close, and has been successful from a point of games won and lost. Copping nineteen and losing eleven isn't so bad. Complete schedule of games played is elsewhere on this page.

You will also find complete batting and fielding averages of every player who has participated in any game this past season. From these averages, you may consider the first thirteen players listed as those whom the management depended upon at the start of the season to compose the Clow base ball club. All these thirteen players were Clow employees, resided in Newcomerstown, employed at other work, or were regular players on former teams. The other fifteen players listed were imported to replace home boys who quit, or whom the management considered inefficient.

Now these players, so replaced, seem to think they were not given a square deal.

It is some job managing any base ball club, especially one whose players are under no contract, as these players cannot be controlled in same manner as the paid performers.

Soon after the season started, Manager Hamilton filled an apparent weak spot with an imported player. Ham did it, no doubt, to strengthen his lineup, in view of some hard games ahead. Well, the home player replaced, receiving no compensation, playing only for his desire to play, naturally refused to do bench duty. The imported player received a salary and expenses, being the only paid player on the team besides the battery. This seems to have started the defection among the home players, growing, until the last game at Coshocton, when only two Clow employees were in the lineup, and in which game were only five of the thirteen players mentioned above. Three of these five claim they received less for playing the five games of the Coshocton series than those imported received for playing one game.

Did the imported players do better work than the local boys? Individually in some cases, yes. Collectively, No. Scoring figures show that all players of our club batted .269 for the season. Those thirteen players hit for this same .269 average. The imported ones fielded .891 for the season while the home products cavorted for .920.

It is necessary, to manage a ball team successfully, that all players be paid on the same basis, with a salary limit, with specified com-

pulsory practice sessions. A team composed of stars coming in once weekly for one game, will never play inside ball of any great degree of efficiency with only the usual few minutes workout before each game.

Give us next year a team under contract, a new grandstand and watch us sail!

September Was Big Base Ball Month

Since those box scores shown in our September number, the Clows have won seven and lost five games. The saddest blow being the five game series dropped to Coshocton. We did win the two games of the series played here. The first one on Sept. 11th being a real pitchers' battle between Welsch and Payne. It was a scoreless tie 'till the last half of the ninth, when Jenks Latham, after two were down, watched two strikes sail over the platter, then two balls; but patted the next one to the creek for a homer. Next day we suffered a 6 to 0 shutout at Coshocton. Sept. 18th, Welsch again won at Warner Field by a score of 5 to 3. But on the 19th Coshocton handed us another shutout 8 to 0. Sept. 6th, another pitching duel was staged by Welsch and Payne; but Coshocton's infield was too heavily loaded, and these new players, aided by some freak fielding on our part won the game for Coshocton by a 3 to 2 score, and also the series. The Clows fought hard however and kept the score tied 'till the ninth inning.

The Clows won a close game from the P. H. A. C. Sept. 24th, and kept up their record of not having been beaten by a Tuscarawas county team. Games are yet scheduled at Dennison for Saturday and Sunday, Oct. 2nd and 3rd, and after that starts a six-game series between Newcomerstown, P. H. A. C. and New Philadelphia Americas.

Miss Goldie Quinn resigned her position as stenographer, effective Sept. 15th.

Mr. and Mrs. Emerson Fowler enjoyed the week of Sept. 6th to 11th visiting relatives and taking in the State Fair at Wheeling.

Messrs. Samuel and Clarence Dawson and their families enjoyed a motor trip vacation into western Ohio.

Miss Wilma Miskimen has accepted a position as stenographer made vacant by Miss Quinn's resignation.

"I WILLS"

1. I will be square—I will not do any man; nor shall any man do me.
2. I will be thorough—I will do my work carefully today that tomorrow will bring no regrets.
3. I will be happy—I will train my face to wear a smile and my tongue to say pleasant things.
4. I will be faithful—I will stick

to my task till it's done, and forget the clock.

5. I will be energetic. When the alarm clock rings I will get up at once.
6. I will be more saving.
- 7.—I will work harder—I will remember that a man who does no more than he's paid for never gets paid for more than he does.
