Published Monthly

NEWCOMERSTOWN FOUNDRY NOTES

Concrete pits and floors and heavy timber structures are marching along at the Radiator Foundry, making everything ready for the successful operation of the new system of making radiators soon to be installed there.

June 7th, the Flange Machine shop started on a Production Bonus basis and the boys fairly ran over themselves to see who could make the biggest killing. Well, they are making good and everyone likes the system which is sure to make the boys more money than the straight wage proposition.

After passing over the boundary into Mexico, a citizen of South Alabama saw a large sign over a building, "BAR". He searched his memory and presently remembered having seen those letters somewhere before. He entered and there was a man behind the counter with a white coat on, the floor was covered with sawdust and there was a brass rail 'n everything. He feebly reached for a pencil and pad of paper and wrote, "Give me a glass of whisky," and he got it. After repeated doses he wrote, "How much do I owe you?" The bartender wrote, "We never charge the deaf and dumb." Then the Alabamian wrote back: "H—, I'm not deaf and dumb. I'm from Alabama. I'm so dry I can't talk."

The colored employes have organized a get-together-club with about a one hundred per cent membership. The intent and purpose of the club is to organize against absenteeism. They are going to prove to each other that a man's absence from work is not only costing him his day's wages but it is also costing his fellow worker money by decreasing the amount of his Production Bonus. That the time is now present for each man to work every day he possibly can and to save something of that which he earns, also to emphasize the fact that when work becomes slack and men more plenty than they are today, that the man who has not worked steady will be the one to be laid-off. Rev. Hariston and William Starns have gotten the big idea and are making an honest effort to get the men of their race to see the present situation as it really is. Power to them and more power to them is our wish.

Miss Minnie Eagon has accepted the position of Assistant to Dr. Mason and devotes all her time to the Dental Department. The Employes and their dependant families are making very good use of this department and keep them busy most of the time. If you have any work to be done, do not delay but make an appointment and you will receive necessary attention.

General Manager W. C. Clow has issued a notice calling attention to the fact that some employes are in the habit of ringing clock cards for their fellow employes. Any who do this without permission from the office are subject to discharge from the employ of the Company and we are sure no one wants to be dismissed on a charge of this kind, and we believe that the notice which

(Continued on Page 3)

Pipe Makers

When the cores all scab and the iron won't run,
An' the scrap pile looks 'most high as the sun,
An' the moulds won't dry, and the cores ain't straight,
An' your shift gets off about two hours late—
Then you're Scrap Dealers, boys,
You're Scrap Dealers.

An' when the core oven gas really does burn hot,
An' the cupola's melting right up to the dot,
An' the iron runs right, and the sand does tamp,
An' the cranes run smooth, and the moulds ain't damp—
The you're Moulders, boys,
You're Moulders.

An' when the cores all center, and the pipe's right weight,
An' the honeycomb's absent, and the bell's on straight,
An' the sand's just right, and there aint a blamed blunder,
An' everything runs like a streak o' greased thunder—
Then you're Artists, my boys,
You're Artists

An' when it rains like blazes, or gets bitin' cold,
An it looks like the Devil is in every blamed mould,
An' everything's wrong, and trouble's like glue,
But there's no scrap pile when the shift is through—
Then you're Pipe Makers, boys,
You're Pipe Makers.

—R. R. S.

THE COSHOCTON FOUNDRY NOTES

Mr. Pratt, of the Frank D. Chase Co., is rapidly nearing completion the sand screen for the molding floor, and when this is finished, the sand handling for the special foundry will be much more satisfactory.

Two new Buda trucks have been ordered, and will be used on the molding floor for handling sand.

Contractors McNab and Ernest will soon have the concrete floor in the special foundry completed. This will be a great improvement, and will afford a better place for the men to work.

A fire department has been organized with Sidney Grant, industrial foreman, as fire chief, and five firemen, namely: Wm. Swigert, Gabriel Suto, Joe Lamos, Nick Ciorogar and Johan Finestr. From time to time fire drills will be given so as to familiarize the firemen with handling of all the fire apparatus and teach them the most effective way to fight a fire.

The new core ovens both in the pipe foundry and in the special foundry have been completed and tried out. They are working fine, and Jack Horner is wearing a smile extending not only to his ears, but it extends behind his ears too.

On July 1st, draftsman Charles Bergmark leaves the Clow Company and sets sail for Sweden, his native country. We are very sorry to give Mr. Bergmark up, for during his stay with the company, he has made many friends who will hate to see his leave. However he is only going for a visit of a few months, and expects to return to the U. S. A. to continue his studies as a mechanical engineer.

ACCIDENTS

During the months of April and May we were fortunate in not having any accidents of any kind reported for first aid treatment. This is a record to be proud of, and it goes to show that by a little care on the part of every one, the majority of injuries can be avoided. The Safety First Committee is keeping a lookout all the time for places where a person might get hurt, and is trying to get those places well guarded. If any person knows of any machinery not guarded or any place where there is danger of an injury to a fellow workman, it is your duty to report the machine or place to Frank Begley, Archie Jennings or W. R. Todd. If the tools with which you work become battered, or in any way not safe to work with, take it to your foreman and he will have it fixed. Do not leave tools lying around where they may cause some one to get hurt. Never lay anything upon something where it could fall off and hurt an innocent person.

No one can afford to get hurt bad enough to lose time from work and no injury is so small that it does not cause an inconvenience. Let every man practice being careful always in doing something to avoid injury, to self or to a fellow man, and it will not be long until there will be many months to equal April and May.

The Value of Reading

Reading is companionable, education, culture. It upbuilds and furnishes and beautifies the soul. It develops confidence, enriches conversation, and cultivates grace. The knowledge of good books is "the food of youth, the delight of age, the ornament of prosperity, the comfort of adversity."

It is an open door of the best society, a stepping stone to the highest fame, a crown of honor that outshines the sun. These things being true, it is one of life's necessities that the young should read good books and not weary therein. The following suggestions will help to profit in reading:

Plan your reading. Select the books to be read far in advance. Prefer books that are old enough and good enough to be classical; let them be attractive if possible, but pure always.

Vary your reading. Follow romance with history, with biography,

travel, art, science, philosophy, religion. Variety gives breadth and keeps up interest.

Limit your reading. Know a few books well rather than many indifferently. Intensive is better than extensive reading. Big fish swim in deep water.

Fix your reading. To this end read carefully; weigh thoughts; talk them over to yourself and with others; try to remember them. Thinking makes what we read our own.

Enrich your reading. Do this by looking up all allusions to history, poetry, art, mythology, persons, places, etc.

Preserve your reading. Own, if possible, many of the books you read. Mark choice passages in them; make comparisons.

These six things remember, namely: to plan, vary, limit, fix, enrich, and preserve your reading. Thus reading will be one of the most profitable exercises of your life.

GOLDEN WEDDING

June 9th was a gala day at the home of Mr. and Mrs. Samuel Mullett, Neighbor st., when their daughter Hattie and her husband and about 50 near relatives assembled to help them celebrate their golden wedding. A sumptuous dinner was served at the noon hour and the day was pleasantly spent in reminiscences.

Many useful and valuable presents were received and General Manager W. C. Clow in a very appropriate speech presented Mr. and Mrs. Mullett each with a \$10.00 gold piece, a gift from the Clow Club Members, to commemorate the occasion and to show appreciation for Mr. Mullett's 24 years of service with the Company. May they live to enjoy many more wedding anniversaries is the hope of all their friends.

PIPE STORIES

Two young women were married to Musicians. The one, a bride of a year, was pushing a baby carriage in which were three fine babies—triplets, all girls. The other had been in the bonds of matrimony only two or three weeks.

"What beautiful children!" exclaimed the bride.

"Yes," replied the proud mother; "let me tell you of the funniest coincidence. At our wedding supper the boys who played with my husband in the orchestra serenaded him and they played 'Three Little Maids' from The Mikado. Isn't that queer?"

At this the other bride turned pale.

"Mercy," she gasped. At our wedding supper Tom's friends serenaded him also, and they rendered 'The Sextet, from Lucia.'"

GIVE THE RAILROADS A SQUARE DEAL

During the last few years, and particularly during the last few months, we have seen the effect of a break-down in our transportation system. The results of such a break-down reach every citizen and not only cause untold hardships and loss of money but also materially effect the high cost of living.

The railroads have now been returned to their owners after over two years of government control. They were returned in practically worthless condition, with a shortage of equipment, and that which they had in very bad condition, their treasuries empty and the government withholding money due them and with their road-beds run down and their records terribly confused. For a long time they must necessarily be short of facilities and will require the co-operation of the public while they build up their systems in order to catch up with the country's progress.

The building up of the railroad is vital to you and to this Company. There can be no safe foundation for prosperity until the railroads of this country are upon a paying basis and in a position to give service to all. American sense of "fair play" demands that they be given this opportunity and this Company for one is willing to urge co-operation with the railroad on the part of Congress and on the part of every individual to help them build up the service to meet the Nation's requirements.

JAS. B. CLOW & SONS.

PRODUCTION BONUS

Some men have an idea that a Production Bonus is given for the benefit of the company, when, as a matter of fact, Production Bonus is a logical means of giving wage earners an opportunity to increase their earnings. The cry of the Nation is to increase production that the cost of production can and will be lowered. In many cases men are expected to produce more than they have been producing for the same pay they have been receiving, and in other cases, where it is known that production cannot be increased, it is only possible to get more saleable product by having less loss of that which is being made, and on this less loss or increased amount of saleable product the workman is given part of the dollars he has helped save and that is termed Production Bonus, which you can readily see comes from two sources, making more than you have been making and making better than you have been making. The amount of production bonus you receive depends entirely on the interest you and your fellow workers show in your work. In the Pipe Shop, if a good man who thoroughly understands his work, lays off, some one who does not understand that particular job quite so well must take his place and by reason of this change or shifting you make some bad pipe, it means a loss to every employe of that department for the day's work. Each man is really working for himself and it is reasonable for him to put forth his best efforts to get the best possible results. He should work every day that he is able, for no one can shift into his job and get as good results as he himself can, so you owe it to your fellow workers to hold your job and do your work right to the

end that you and your fellow workers will earn and receive a good substantial Production Bonus each pay day.

WEDDINGS

In one of the issues of the "News" several months ago, we predicted matrimony when electrician Virgil Bucklew bought a house in town, and could not believe him when he said the purchase was made just to be close to his work. So we find we were right, for Virgil waited until the month of roses, when he and Miss Virgie Stewart of Warsaw were united in marriage, and after spending a short honeymoon visiting in the country, returned to the new home on South Ninth street.

DEATH

On May 29th, Marion Davis, aged 47, died very suddenly while at Huntington, W. Va. The cause of his death being heart failure. He leaves a widow, one daughter and two sons, Harry and Dean, besides a host of friends, to mourn his death.

For many years he was an active worker of the Salvation Army, and all who knew him found him to be a conscientious Christian man. He was returning from an open air service to the Salvation Army headquarters in Huntington, and was entering the doorway when he fell dead.

He was a molder by trade and had been with the Clow company steady for many years either making cores or molding. When the Clow company in 1916 gave to the employees life insurance, Marion Davis took advantage of the offer and by remaining in the employ of the Clow company, his widow has received a check for \$900.00 which was the amount of his insurance. Had Mr. Davis left the employ of the company of his own will, the insurance would have been cancelled and his family would have been \$900.00 losers.

ODE TO A SAND SCREEN

(By L. W. M.)

They gave me a blue-print of a new sand screen.

It's the finest thing that ever was seen.

You can't go wrong on a rivet or nail, For this sketch is perfect in every detail.

So we studied the blue-print with diligent care

And scribed it off to a tenth part of a hair.

We cut up some I beams and angle bars,

Then stopped and fixed up a transfer car.

Or a molding machine, or put a key in a crane,

And then right back and at it again, For Jack is quite anxious about its completion,

He can't raise the tonnage without this new addition.

By this process, in two or three months we get thru,

Then Schwab comes down and says it won't do;

The sand screen's too wide between the bars,

The crane's too low, it won't let in the cars.

The shoot's too flat, it clogs up with sand,

And the darned thing will shake its self clear off the stand.

Just go get your tools and bring out your men

And tear it all down and build it over again.

I said to the boss, "This job makes me tired."

He smiled and replied: 'Twas for this you was hired;

Don't mind what your doing, so you work every day,

And then on payday you'll draw a full pay."

WOMAN'S CORNER

Nut Sandwiches

Chop together one cupful of hickory nuts, walnuts and pecan meats, add half the quantity of mashed hard-boiled eggs that you have meats. Mix with mayonnaise dressing and spread between slices of buttered bread to which has been added a lettuce leaf trimmed to fit the bread.

Creamed Dried Beef With Biscuit

1 cupful evaporated milk.
2 table-spoonful cold water.
1 small jar dried beef.
1 level teaspoonful cornstarch.

Scald evaporated milk in double boiler, add cornstarch mixed with water and cook until thickened. Wash dried beef in warm water and drain. Add to milk and let cook ten minutes. Remove tops from hot biscuits, hollow out centers and fill with dried beef, replace top and serve at once. Centers of biscuits may be used for dumplings with chicken or meat stew.

Pear Perfection

5 halves Barlett pears.
20 marshmallows.
1 cupful pear juice.
1 teaspoonful lemon juice.

Cut marshmallows in quarters and add to pear and lemon juice. Stand in cool place stirring occasionally, until pear juice is all absorbed. Chill pears, fill centers with marshmallow mixture and top with candied cherries or bits of current jelly.

Wedding Anniversaries

First—paper.
Third—leather.
Fifth—wooden.
Tenth—tin.
Fifteenth—crystal.
twenty-fifth—silver.
Fiftieth—golden.
Seventy-fifth—diamond.

Household Hints

Stains from peering fruits and vegetables can easily be removed from the fingers by washing in strong tea and rinsing in warm water.

Hot vinegar will remove paint splashes from windows.

If you soak a cork in boiling water for ten minutes, it will easily fit into any bottle.

A badly faded cotton garment can be made a very clear white by boiling in water to which has been added cream of tartar.

"What magazine will give me the highest position quickest?" asked an ambitious young writer. "A powder magazine if you contribute a fiery article!" was the reply.

Father—"Every time you are bad, I get another gray hair."

Son—"Well, you must have been a corker. Look at grandpa."—Wire and Pipe.

I do not like this Oswald Shirk,

He is a lazy slob;

He tells me that it is real hard work To find an easy job.

OBSOLETE

A little girl walked into a confectionery, placed a nickel on the counter and called for an ice cream cone.

"Ice cream cones are 7 cents, little girl," the clerk announced.

"Well then gimme a soda pop."

"Six cents."

"Got any root beer?"

"Yep, 6 cents, too."

The little girl sighed disappointedly and started out, leaving the nickel on the counter.

"Here, little girl, you're leaving your nickel," the clerk called to her.

"Oh, that's all right," the child shouted back. "It's no good to me—it won't buy anything!"—Indianapolis News.

Coshocton Pick-Ups

Lew Merrell and Charles Mugford are practicing singing for the Clow Club quartette by singing in the M. E. church choir.

Machinist Phil Allen wanted something to burn gas, so he bought an Overland automobile, and can be seen almost every evening speeding along the highway.

Asst. Supt. J. A. Byers and Foreman Huff were in Pittsburg recently on company business.

Repairman Wm. Bordenkircher claims to have a new way of exterminating the potato bugs as they appear upon his potatoes. Drive your chickens over to our potatoe patch, Willie, for we have lots of that kind of chicken feed.

Craneman "Hank" Turnbull evidently does not believe in the eight hour work day, and much prefers longer hours, for it is rumored around the foundry he likes Clowville so well that he brings his supper down and eats it beneath the big elm which stands near the railroad crossing.

The question is frequently heard asked around the shipping yard, "Why is it that Willis Dawson spends son much time in the evening down towards the river and never goes fishing?"

Then, too, it is wanted to know what "Hank" Turnbull was doing down the line the night the coal

in the pit caught on fire, for no one saw Hank helping put out the fire.

Craneman C. S. Hagans has been forced to be away from work a couple of weeks on account of his small son's very serious illness with spinal meningitis. At this writing we are glad to learn his son is convalescent.

The most faithful and consistent fisherman we know is Machinist Jno. Criswell. John has not caught anything yet, but says he has patience and thinks he will try Harry Miller's bait the next time he goes.

Owen Fagan wants to sell one cylinder of his Saxon car, for he says his car only hits on three and he has no use for the fourth cylinder.

Even the birds like "Hank" Turnbull, for last spring when the robins were singing sweetest "Hank" coaxed one to come build her nest beneath the floor of his crane where it would be out of danger from all bad boys. All went well for awhile; the nest was built; the eggs laid; the mother bird hatched out four young songsters and "Hank" rode the birds up and down the crane runway of the loading crane. But alas, one day, either the birds failed to sing for "Hank" or he dosed off to sleep and sent an electric current through the nest, causing a small fire and forever taking the life of all the real music around the shipping yard.

MASSILLON AGATHONS HERE JULY 16

Friday afternoon, July 16th, the fans of this locality will have an opportunity to see in action the Massillon Agathon, or Central Steel club of Massillon, the semi-professional champions of the middle west. This team is reputed to be the equal of

any team in class AA minor leagues, such as the American Association or International. To give a comparison better known to the fans of this section, they have completely outclassed the P. H. A. C. of Dennison at every meeting. Their lineup consists of the following:

Blackburn, Boston Nationals, catcher; Agler, Western League, first base; Cain, Texas League, second base; Hobbs, Cincinnati Nationals, short stop; Kirsch, Washington Americans, third base; Hartle, New York Americans, center field; Williams, St. Louis Americans, left field; Stegfried, Central League, right field; Utility, Scott, Central League and Clancy of Ohio State League. For pitching staff they claim Carpenter and Monroe of the New York Americans, Packard of the Philadelphia Nationals and Hart of the Central League. George Textor, formerly of Indianapolis American Association, manages the Agathons. Both Carpenter and Textor have been seen in action on the local field.

An effort is being made by the Clow ball management to have the business men defer their afternoon closing that week from Wednesday till Friday, as the club will be at a great expense securing such high class attraction.

Mr. Ralph Leighninger, one of our very best in the Ball Team has accepted the position of Assistant to Mr. Pickering. Their duties are to get out local shipments.

COSHOCTON'S INDUSTRIAL TEAM

The Clow industrial league team to date has won two games and lost four, which is not so good a showing as we had hoped, yet the team is improving both individually and collectively, and at present the team is putting up a good class of ball. Tyndal, which is considered the strongest team in the league, only beat us by a score of 4 to 3, and had it not been for the "fatal" first inning, in which errors on our part let in two scores, the Clow team would have come out victorious. In the early season, owing to the players not trying out for the team, we did not have as strong a line up as we now have. Some of the players have had to play positions on the team which were entirely new to them, and as a result did not field their positions as well as their regular place, but from now on, watch the Clow team go! With the class of ball Wm. Bordenkircher, Henry Clark, Clarence Callentine and Walter Bordenkircher have been playing, and the way the other players are getting into the game, the Clow team is going to be hard to beat from now on. The players who played in the last three games are: Callentine, rf, W. D. Bordenkircher 3b, Henry Clark cf-p, Wm. Bordenkircher 2b, Pierce lb, Francis Clark ss, Randles rf, Kohl c, Fagan p, Wilson lf.

NEWCOMERSTOWN FOUNDRY NOTES

(Continued from Page 1)

was posted will be sufficient warning and that the practice will not be further indulged in. Just remember when you ask your fellow workman to ring your clock card for you, you are asking him to do something strictly against the rules of the Company.

For Sale—One refrigerator. One davenport. One four-hole laundry stove. Henry Hartman, Gasteam Department.

BIRTHS

On June 7th, Augusta June Boltz arrived at the home of Mrs. Mary Boltz on River st. How unfortunate that the father Junius Boltz met with an untimely death, for this youngster would have been his pride and joy. Mother and daughter are getting along fine.

Born to Mr. and Mrs. Frank Twyman, Juanita June, Friday, June 11. Mother and daughter doing fine.

LIVE AND LEARN

This is an age in which many things new are being learned, and many experiments in science are being made, and we are made to believe and not to be surprised if the seemingly impossible becomes a reality but, about the newest experiment we have heard of was when repairman Harry Miller announced that sparrows make good fishing bait. There is a disadvantage tho in having live sparrows for bait, Harry says, for when you put them in the water they drown too easily.

PERSONALS

President William E. Clow and Vice Pres. Kent S. Clow were visitors at the foundries May 26th and 27th.

Mr. and Mrs. Case of Trenton, N. J. have been having quite an extended visit with Mrs. Case's parents, Supt. and Mrs. John Horner of Canal St.

We are glad to note that Mr. John Mardis is able to be again with us after having an operation for rupture. He is not able to take over his old job, so was given the College st., gate to take care of until he gets to feeling better.

Mr. R. M. Marlowe, who for several years has been Superintendent of our Public Schools, has accepted a position in the shipping office and started on his new duties June 7th. We believe that his training received in the past will be very valuable to him in his new work and that he will be able to make a place for himself in our organization.

Mr. B. W. Vansickel met with a very painful accident the first of the month while erecting some steel posts for the loading trolley, but he was lucky and is again at his duties.

Mr. Wm. M. Huston has returned to our employ and has been given a place on the cupola gang of the Rad. Foundry. "Bill" is a good steady man and we are always glad to welcome his kind back into the service.

Miss Frieda Bonnell has resigned her position in the office, effective July 15th, and will accompany her mother to Cleveland and expects to make her future home there. Getting quite a ways from Coshocton but then "Everything comes to she who waits."

Yard Foreman Geo. Gardner has been favored with a visit from his daughter Emma and the grandchildren from Richmond, Ind.

Mr. John Anslover had the misfortune to fall into pit No. 1 and severely bruised his arm which necessitated about three weeks of lay off.

Mr. John Boltz, of the cupola gang had quite a nice trip June 21 to 26, as a delegate of the local Moose Lodge to Mooseheart, Ind. On the return trip he stopped over in Chicago, visiting the parks and other points of interest and, of course visited the Chicago Office. He was taken in charge by Mr. O'Day and shown through the Clow building from top to bottom and is very warm in his praise of the magnitude of the

Safety First

With all the safety appliances we have installed, we still have some accidents which are quite painful, and in most cases we find it is a case of pure carelessness. It's a safe saying that "It's hard to learn an old dog new tricks" so we must conclude that the Safety movement must have its beginning in the home among the youngsters, so we who do not teach our children how to do things in a safe way are letting them proceed along a line that will bring them trouble. Instead of saying to a child "Now don't do that," having in your mind that if they do, they will get hurt, let them do it, but show them how to do it with the greatest degree of safety to themselves. If they acquire a habit of doing things in a safe way in their youth, they will naturally follow their earlier training as they grow older. Teach the child safety, and you have made it a safe adult.

Chicago business.

Jos. L. Sheets of the Industrial Railroad was given quite a baptising a few days ago. They were changing the position of the hauling cable at the sand plant, some of the boys were on dry ground and Joe and others were in a boat, Joe expressed the fear that the others would be dragged into the river and he raised up in the boat and with all his might and main began to pull on the cable, he pulled so hard that the boat sided and threw himself and Dan'l Patterson out into the water up to their arm-pits. Of course on the face of it, it didn't seem to be a laughing matter but the boys said the way it all happened it was too funny and and they had to express themselves very forcibly. Berkheimer says he didn't care if they did get wet but that he just naturally had to cry when he discovered they had lost one of his engine wrenches. Results, however, are what count and the moving of the cable has placed the bucket into a pocket of the finest kind of sand and they are getting plenty of it.

Samuel Boltz jr., of the Gasteam Dept. is accompanying the Democratic Glee Club which is with the Ohio contingent of the National Democratic Delegates assembled in Frisco. This will be a big treat for Sam and we venture the prediction that he will have lots to tell his pals when he returns from his trip.

President William E. Clow and son, Vice Pres. Kent S. Clow were visitors at the Ohio foundries for a day at the close of the month.

Yardman Harry Kinney is the official snake charmer around the foundry. "He eats 'em alive."

Repairman Owen Fagan thought he found a good buy when he bought a Saxon auto. However, Owen says he has found only half enough parts to equip the Saxon, but hopes to get his car in running order in time to go nutting in the fall.

She—"I'll never go anywhere with you as long as I live."

He—"Wh-Why?"

She—"You asked Mrs. Smith how her husband was standing the heat, and he's been dead two months."

"My dear," said the caller, in a stage whisper, "it came to me in strict confidence, and you musn't breathe a word to a living soul! It is the most sacred communication. Promise me? Well, they say—"

And as she left the house five minutes later she smiled and said to her inmost self:

"Well, thank goodness, now I've got that published!"—Exchange.

BASE BALL CHATTER

Clows vs. Tuscarawas, Warner Field, May 29, 1920.

Runs—Flory, Stewart 2, Lyons, Trees. Errors—Walton 2, Flory, Crouch 3. Two-base hits, Johnson, Norman. Three-base hits, Flory. Stolen bases—Miner, Leighninger, Stewart 2, Sheets, Farnsworth. Struck out—by Oswald 8, by Norman 9. Double plays—Norman, Stewart and Trees. First on balls—off Oswald 4; off Norman 1. Earned runs, Tuscarawas 1, Clows 2. Left on bases—Tuscarawas 5; Clows 9. Hit by pitcher—Kopp. Time—1:45. Umpire—Lamneck.

GAMES SCHEDULED

- Saturday, July 3—Canton Somerdales.
- Monday, July 5—Akron Independents, double header.
- Saturday, July 10—Steubenville.
- Saturday, July 17—East Liverpool.
- Saturday, July 24—Carrollton.
- Saturday, July 31—Springfield, O.
- Saturday, Aug. 7—Millersburg.

Bullett Lyons muffed a fly during one game, and fell down twice trying to field hits in another game before we discovered that his wife had departed for a long visit to Louisiana; but if this continues it will pay the ball club management to get Mrs. Lyons home quickly as possible. We had no idea it would affect Bullett like that. We also recall that a few days ago he ran into something and skinned up his nose.

There hasn't ben a team played at Warner Field this year but who wants to return here again. The ball management has made an iron clad rule that all visiting teams are to be given as good a chance to win, if not better than our own boys.

If there is any battery who works so well together around this neck of the woods as Welsch and Latham we failed to see them in action.

Runs — Sullivan, Leighninger, Stewart 2, Lyons 2, Latham 3, Welsch, Trees, Underhill. Errors—Caldwell, Kelley, Sullivan 3, Floyd. Two-base hits—Kelley, Welsch. Three-base hits—Welsch. Stolen bases—Sullivan 3, Malone, Leighninger, Lyons, Trees 2, Lamneck, Underhill 2. Struck out—by Shannon 3, by Hosier 3, by Welsch 5, by Sheets 5. Double plays—Hosier, Lloyd and Sullivan. First on balls—Off Shannon 4, off Welsch 2, off Sheets 3. Hits—9 hits and 11 runs off Shannon in 4 2-3 innings, 1 hit and no runs off Hosier in 3 1-3 innings, 2 hits and no runs off Welsch in four innings, 3 hits and one run off Sheets in five innings. Earned runs—Clows 3, Columbus 1. Left on bases, Clows 8, Columbus 6. Wild pitch—Sheets. Passed ball—Latham. Winning pitcher—Welsch. Losing pitcher—Shannon. Time—2:03. Umpires—Parsons and Hagan.

*Batted for Malone in ninth.
**Batted for Floyd in ninth.

No more that grandstand stuff
To create admiration
From his sweetheart.

No more can he work a bluff
On other folks,
And lay the blame for all his errors
On someone else.

His independent days are o'er.
We thot he'd had enough of war.
He's given himself for better or worse—
It must be for better, it couldn't be worse.

They say
That Red
Has wed.

Left on bases—Tuscarawas 5, Clows 10. Hit by pitcher—by Oswald (W. Welsch, Leighninger.) Balk—Norman. Losing pitcher—Oswold. Time—2:16. Umpire Stull.

Manager Hamilton says he is going to lasso Lamneck as soon as he gets on first base so he can keep him from running wild.

For the last couple weeks, Stewart seemed in a whirl. We feel very sorry, not for Red, Well, No! But for the girl.

If "Jack" Norman just puts a little more pep into his pitching he will become as great a ball player as his father, and that's saying something.

We heard some guy address "Pone" Sheets the other day as "Slim." Anyway it sounds a little more refined than something corn-fed.

Sunday, June 27th, the Clows played the Federals at Coshocton. The Chautauqua tent occupied the ball grounds on Saturday, June 26, and rain prevented a game with Massillon on June 5th.

Warner Field, June 19th, Newell, W. Va., vs. Clows

NEWELL	AB	H	O	A

Stewart, 2b	4	0	3	1
Lyons, cf	4	2	0	0
Welsch, p	4	1	0	5
Latham, c	4	0	15	1
Trees, 1b	4	2	7	0
Lamneck, lf	4	1	0	0
Norman, rf	3	2	0	0
Sheets, 3b	3	0	0	1
Total	34	8	27	8

Innings	1	2	3	4	5	6	7	8	9
Newell	0	0	0	0	0	0	1	2	0
Clows	0	0	0	2	0	0	0	0	2

Runs, Rager, Baley, Collins, Trees, Norman; Errors, Bailey, Trees, Sheets 2; Two base hits, Davis, Norman 2; First base on balls, off Welsch 1; Struck out, by Pollock 11, by Welsch 14; Left on bases, Clows 5, Newell 3; First base on ererors, Newell 3, Clows 0; Earned runs, Clows 1; Time 1:40; Umpire, Stull.

One more ball player is on the list of Clow employees, one "Bing" Ralph Leighninger, who is now an assistant to Pickering in the shipping department, and has shown that he takes his daily duties up as quickly and as seriously as he does baseball. "Bing" has made good at short.

Welsch, Norman and Trees are now tied for that \$25.00 prize offered by J. M. Kaden. The first of them to get a home run cops the prize.

Fred Trees is now "city" mail carrier. We hope it doesn't affect his batting eye.

Including the game of June 19th with the Newell, W. Va., which The Clows lost 3 to 2, our boys have won three and lost two in 5 games played this season. They lost the opener May 22nd, to the Coshocton Federals 8 to 7 in ten innings. They then defeated the Tuscarawas team 4 to 1 May 29th. Decoration Day morning they trounced the Columbus Forge and Iron team 11 to 1, and the Zanesville Independents in the afternoon 4 to 3. June 12th they walked all over the Tuscarawas bunch again 13 to 6; but Saturday, June 19th the Newell W. Va. club, overcoming a two-run lead of the Clows, aided by some weird fielding on the part of the shop boys, won 3 to 2.
