## CHAPTER 8

### Matilda Quillen—1825-

Matilda Quillen was born in 1825 according to the 1850 census where her age is shown as 25. She is not found anywhere in the 1860 census. She either married or died prior to 1860 since she is not in the census records under Quillen. There are no records in Harrison Co. of either event. Her brother Adam named his second child Emaline Matilda born in 1853, after his sister, prior to leaving Ohio for Indiana.

As of this writing she remains the only child of Elihu and Jean that no further record has been found.

Hopefully as this history gets circulated to descendants and copies that will be given to several libraries, the mystery surrounding Matilda will be solved.

## CHAPTER 9

### Mary Jane Quillen—15 Oct 1828 – 12 Aug 1904

Mary Jane was Elihu Sr. and Jean's last recorded child. Since Jean died prior to 1830 she may have died giving birth to Mary Jane or another child prior to 1830. Mary Jane married John Brown on 1 Dec 1850 in Harrison Co., Ohio. She probably met him since the Brown lived next door to the Elihu Quillen Sr. family. This shows in the 1850 Harrison Co., Washington Twp. Census. The 1850 census shows John Brown age 20 and Mary age 17 living with John's mother Jane and his brother Christopher and sister Jane. In the 1860 census, same place, John Brown is age 30, Mary Jane age 31, Sophronia age 7 and Christopher age 3 (named after John's brother). Mary Jane's brother Charles and family are living two households away. The 1870 census, same place, lists John age 42, Mary J. age 42, Sophronia age 16 and Christy age 12. Value of real estate \$2100. No record could be found of them in the 1880 census. They may have moved so that Christopher could get his dental training. The next record of them is the 1900 census where they are listed in Goshen Twp., city of New Philadelphia, Tuscarawas Co. John is listed as born Feb 1828 age 71 and Mary Jane as born Oct 1828, age 71. Copies of the census records are at the end of this chapter. Son Christopher Quillen Brown born 7 July 1858 became a dentist in New Philadelphia and died 13 July 1888. No record of death or marriage has been found for Sophronia after the 1870 census. Christopher married Lola Montez Johnston and their daughters Bertha and Bessie's families have many descendants remaining in Ohio. Extensive research on Bertha's family has been done by James Loomis of Columbus, OH. John Brown is mentioned in his brother-in-law Charles Quillen's 1897 obituary. See Chapter 6. No will for either Mary Jane or John has been found to date. Mary Jane and John Brown are buried in the Fair Avenue cemetery in New Philadelphia, OH. A photo of the tombstones are on the following page.

---

Gravestone for Mary Jane Quillen Brown and husband John in the Fair Avenue Cemetery, New Philadelphia, OH. This cemetery has been incorporated into the East Avenue Cemetery and its records are held by East Avenue. A copy of a partial list of burials at Fair Avenue Cemetery is on the following page.

While the gravestone shows Mary Jane's birth as October 15, 1825 all other information indicates that she was born in 1828. She and John are always shown in census records as the same age.

**RELATIONSHIP CHART**

CP = common progenitor

Numbers outside the diamonds are the generations

R = times removed

B = brother or sister

GN = grandnephew of grandniece

GGN = great grandnephew or great grandniece

C = cousin

N = niece or nephew

S = son or daughter

GS = grandson or granddaughter

GGS = great grandson or great granddaughter

From the common progenitor (CP) at the top, the columns running to the left and right are his or her descendants through two different lines, running to the seventh great grandchild.

The diamonds show relationship of anyone in one line to someone in the other line of descent. The numbers outside the diamonds show the number of generations from the common progenitor that they have. Sons or daughters, for example, are only one generation from the common progenitor. Follow the '1' from each side to where they cross. The diamond shows 'B' for brother or sister. If you are a grandson or granddaughter and the other person is also a grandson or granddaughter, both are two generations from the common progenitor. Follow line '2' to where they cross and it shows '1C' for first cousins.

Try a harder one. Say you are five generations away from a common progenitor and the person you are checking on is only four generations from the same common progenitor. Go down one side to '5' and the other to '4', follow to where they cross and you see '3C 1R', third cousins once removed.
